EDUCATION

Virginia Polytechnic Institute and State University | Blacksburg, VA *Expected May 2027*
B.S. in Computer Science **Minor:** Mathematics **GPA:** 3.1
Relevant Coursework: Introduction to Artificial Intelligence, Data Structures & Algorithms, Computer Organization, Intermediate Software Design & Engineering, Computer Systems
Northern Virginia Community College — A.S. Computer Science Dec *2024*

RESEARCH INTERESTS

Artificial Intelligence • Machine Learning • Large Language Models • Multi-Agent AI Systems • Applied AI

TECHNICAL SKILLS

Programming: Python, Java, C++, C#, HTML/CSS, MATLAB
Technologies: React Native, Flask, Firebase, Firestore, Git/GitHub, Unity, Aseprite
AI/Development Tools: Gemini AI API, ElevenLabs, Jest
Languages: Spanish (Native), English (Fluent), German (Basic)

SELECTED TECHNICAL PROJECTS

HomeCrew — **AI-Powered Home Inspection Assistant |** *Next.js · FastAPI · Gemma · Google Cloud · Firestore · Multi-Agent AI*
GDG Hacakton

- Collaborated with a team to develop a multimodal AI application that helps renters identify maintenance issues, document property conditions, and prepare repair requests.
- Integrated specialized AI agents and contributed to frontend development, backend functionality, and user experience design.
- Won 3rd Place at the Google Developer Groups Virginia Tech Hackaton.

HokieAssist— **AI-Powered Campus Accessibility Mobile App |** *React Native, Expo, TypeScript, REST APIs*
Deloitte × Databricks / Cloudforce Hackathon, Virginia Tech

- Led frontend development of a React Native/Expo campus accessibility app, building interfaces for personalized access needs, accessible routes, events, and student resources.
- Integrated route and accessibility data to surface factors such as stairs, elevators, slope, crowd level, lighting, and indoor/outdoor navigation.
- Collaborated in a Git/GitHub team workflow to integrate frontend components with backend data and AI-assisted accessibility features.

CalcGuard —Personal Safety Mobile App | *React Native, Firebase, Gemini AI, ElevenLabs, Jest*
HackViolet at Virginia Tech

- Built a covert personal-safety mobile application disguised as a calculator, allowing users to trigger emergency features through secret codes.
- Developed the full-stack functionality using React Native, Firebase Cloud Functions, Firestore, and Firebase Storage to support emergency alerts, GPS sharing, recordings, and simulated calls.
- Integrated Gemini AI and ElevenLabs to incorporate AI-powered and voice-based functionality into the application.
- Implemented encrypted local storage and developed 50+ Jest unit tests to test application functionality and improve reliability.

Tona — Weather-Based Outfit Recommender | *Python, Flask, HTML/CSS*

- Developed a full-stack web application that generates personalized outfit recommendations based on weather conditions, temperature, and user-selected occasions.
- Implemented Python-based recommendation logic using conditional statements and structured data to match clothing options with environmental and user inputs.
- Built and connected the HTML/CSS front end to the Python backend using Flask routing, enabling user inputs to generate and display outfit recommendations dynamically.

Cinthia's Bakery | *C, Unity, Aseprite*

- Developed a 2D side-scrolling platform game in C and Unity featuring animated obstacles, collectible items, and multi-level progression.

- Designed original pixel-art game assets and animations using Aseprite and integrated them into the Unity game environment.
- Implemented core gameplay mechanics including player interactions, level progression, and interactive game elements.
- Earned 1st Place at the Virginia Regional Interactive Applications & Game Development competition.

EXPERIENCE

Virginia Tech Department of Computer Science **Blacksburg, VA**
Student Office Assistant, Graduate Programs Office *Aug 2026 – Present*

- Serve as a front-line resource for Computer Science students, faculty, staff, and visitors, answering questions and directing inquiries to appropriate university resources.
- Manage student check-ins, appointments, phone inquiries, and administrative tasks for the Graduate Programs Office.
- Support CS student programming, events, information sessions, and day-to-day office operations while handling student information professionally.

Provost's Office at Northern Virginia Community College **Annandale, VA**
Student Office Assistant *Oct 2025 – Dec 2025*

- Supported daily administrative operations for the Provost's Office by assisting students, faculty, staff, and visitors with general inquiries and directing them to appropriate resources.
- Managed incoming phone calls, organized office records and documents, and supported routine administrative tasks to keep office operations running smoothly.
- Maintained organized and professional communication while working with university personnel and handling office information.

Goethe-Institut **Washington, DC & Berlin, Germany**
Engineering Intern/International Engineering Exchange *Apr 2023 – Nov 2023*

- Participated in an international engineering exchange across Washington, DC, and Berlin, gaining exposure to global technology and engineering organizations.
- Studied German through the Goethe-Institut to develop communication skills for interactions with German engineering companies and professionals.
- Collaborated with cross-cultural teams to develop and present engineering-focused projects, including a presentation at the U.S. Embassy.

LEADERSHIP & INVOLVEMENT

Accenture Build Challenge – Participant (In Progress)

- Participating in a technology-focused challenge focused on developing and presenting an innovative solution.
- Preparing a technical project and final pitch for presentation on November 20, 2026.

Association for Women in Computing (AWC) **Virginia Tech**
Events Chair *Aug 2026 – Present*

- Coordinate technical, professional development, and social events for Virginia Tech computing students.
- Collaborate with AWC leadership to plan event logistics, programming, and member engagement.

Dance of Nations **Virginia Tech**
Team Leader & Choreographer *Fall 2025*

- Led a four-member performance team, choreographed routines, coordinated rehearsals, and prepared the group for the Dance of Nations showcase.
- Managed team communication and rehearsal planning to ensure the group was prepared for the final performance.

First Generation Club at Northern Virginia Community College **Annandale, VA**
Executive Board Member — Event Coordinator *Fall 2024*

- Organized events and workshops designed to support and engage first-generation college students.
- Coordinated event logistics, scheduling, and communication while collaborating with other executive board members.

Certifications & Professional Development

AWS Certified AI Practitioner – In Preparation
Currently completing AWS AI learning materials covering foundational artificial intelligence, machine learning, and generative AI concepts.
